Republic of Kosovo

Education

Bachelor of Computer Science

UNI - Universum International College
2020-2023

Tech skills

Proficient in the .NET platform
Relational databases (MSSQL & PSQL)
In-memory & Redis caching
Apache Kafka
Docker
Vanilla JS & JQuery

Languages

Albanian
English

About me

Highly skilled Software developer, adept at working in agile environments and collaborating with cross-functional teams to deliver high-quality software solutions. Strong problem-solving abilities with a focus on scalability, performance, and user experience. Passionate about continuous learning and staying current with emerging technologies to deliver innovative solutions that meet both business and technical needs.

Experience

Software engineer

Mars 2023 - Present

Gjirafa Inc.

- Developed scalable and secure server-side components seamlessly integrated with other services in a distributed architecture.
- Refactored and improved the legacy codebase to utilize new .NET features.
- Established reliable communication between services using RESTful APIs, event streaming platforms, and WebSockets.
- Contributed to the client-side development of an MVC application, delivering a seamless UI and enhanced UX.
- Designed database schemas aligned with business requirements.

Fellow

May 2022 - March 2023

Life from Gjirafa

- Completed comprehensive training in algorithms & data structures, computer architecture, SQL & NOSQL databases, and object-oriented programming.
- Gained expertise in Frontend, Backend, and DevOps practices.
- Specialized in advanced Backend development.
- Enhanced software engineering skills and project management capabilities.
- Interacted with high profile industry guests to gain valuable insights.
